ORGANISM AND PROCESS PARAMETERS
strain composition (C, N, P) · productivity · operating days · reactor/pond type
harvesting recovery · drying · extraction · plant scale
SHARED MASS AND ENERGY BALANCE
flows per kg of product + annual production
computed ONCE; both layers read it
TEA LAYER
prices · CAPEX factors · labour · installation and indirect
factors · depreciation · discount rate · tax
LCA LAYER
characterization factors · grid mix
biogenic-carbon convention · system boundary
production cost · CAPEX
NPV · IRR · MEPP
gross GWP · biogenic adjustment · net GWP
CED · water · land · eutrophication
prices and characterization factors are NOT inputs to the physical balance
